Poles

In the past couple of years, street lighting has transformed from merely lighting the streets to beautification of urban spaces. This has enhanced the role of aesthetics and efficiency in Street lighting, thus, leading to the concept of Street Furniture, which comprises of aesthetically appealing luminaires and various types of Poles.

Wipro Lighting offers comprehensive range of Poles in various categories including Swaged Poles, Octagonal Poles, Conical Poles in various heights and specifications. Decorative Poles and Brackets are also available on request.

The Design & Specification of the Poles and the luminaires depend on the type of application.

High Mast Lighting

High mast lighting is currently the most efficient and cost effective way of illuminating large outdoor areas like industrial areas, highways and intersections, rail yards, container storage areas, truck terminals, prisons, public parks, campuses, sports arena and shopping center parking lots.

High Masts can be mounted at considerable heights, thus rendering uniform illumination to the entire area. It also enables easier installation and maintenance of luminaires due to motorized controls that lowers and raises the luminaires. The sleek High Mast Lighting is also aesthetically superior to the conventional lattice structures or lower height poles.

Wipro Lighting offers comprehensive range of solutions in High Masts. The range is available in standard heights, 12.5 / 16 / 20 / 25 / 30 metres. All these options are available in various luminaire combinations depending upon lighting design requirements.

High Masts and High Wattage floodlights for specific applications such as stadium lighting are also available.

Wipro Lighting has a dedicated team of Lighting Design Engineers located across India to recommend a comprehensive solution as per customer requirements. For more Techno - Commercial details on Poles and High Mast Lighting, contact our nearest Branch or write to helpdesk.lighting@wipro.com.
